Neurocysticercosis

Gaurav K Sharma*, Angie Tripathi, Taimur Abbasi and Michael Megaly

Department of Internal Medicine, Mercy Hospital & Medical Center, Chicago, IL, United States

Figure 1: Initial MRI of brain showing Neurocysticercosis in right frontal lobe.

Figure 2: Arrow pointing at Neurocysticercosis of the right frontal lobe.

Above is an MRI of a 45 year old man who presented to the hospital with a new on-set of seizure disorder. After further work up, MRI was obtained and it (Figures 1 and 2) showed the patient to have a cyst in the right frontal lobe of the brain. He was diagnosed with Neurocysticercosis.
